

SINGLE & MULTI-SIZE WASHING BALLS

LANSAS® SINGLE- AND MULTI-SIZE WASHING BALLS are designed with diagonal ribbing along the periphery. This design, along with adequate head pressure, creates a water vortex action along the pipe walls. This action will wash away packed sand, sludge, rock, grease, and other debris.

The multi-size washing ball is built with the same design and construction as our domehead plugs. These balls have a water fill port that allows the user to control the buoyancy. This feature enhances the performance of these products.
