RMH 10 x 8 w/RC	10'	8'	2675	1649	25	25	25	17

Specially designed for personal protection during manhole installations and repair work. High strength steel walls, welded securely to rigid steel top and bottom framing. Optional replaceable cut-outs allow for clearance of utility lines. RMH Shields are light enough for handling with rubber-tired backhoes, yet provide maximum protection for workers in the hole.
