The low-cost Magna-Trak 101 magnetic locator provides excellent field performance at a budget price! The Magna-Trak 101 features all the same components as the 100, minus the LCD meter display and membrane switch. The operation of this locator is dependent upon only two rotary control knobs: sensitivity and volume.

#### Features:

- Rugged high-impact plastic enclosure with aluminum sensor pole
- Powerful magnetic speaker with waterproof mylar cone
- Lightweight and comfortably balanced for easy handling
- Patented electronic balancing procedure allows balancing to be done quickly and efficiently
- Approximately 100 hours of operation before batteries need changing
- Quick-access battery compartment
- Adjustable sensitivity and volume with power on/off dial
- Deep tone audio signals peak over magnetic objects to easily narrow down searches
- The tube is waterproof to just under the plastic housing, the housing is water-resistant

#### Includes:

- MT101, Magna-Trak 100 Series Magnetic Locator - 19-555
- Soft Carrying Case
- Instruction Manual
