The Magna-Trak 102 magnetic locator provides the same basic performance features as the Magna-Trak 100. However, with the addition of our push button "erase" feature, greater flexibility is achieved and performance is enhanced. When a magnetic disturbance, such as a metal fence, is confronted, simply press the "erase" button and the disturbance is erased for continued searching without interference. The MT 102 locator also indicates a power line visually on the LCD panel.

#### Features:

- Rugged high-impact plastic enclosure with aluminum sensor pole
- Powerful magnetic speaker with waterproof mylar cone
- Lightweight and comfortably balanced for easy handling
- Easy view LCD display for visual signal strength and informative indicators
- LCD display includes two digit numeric signal indicator, expanding analog bar-graph signal indicator, and flashing Low Battery indicator
- Power line indicator displays a flashing "CAUTION! Power Line" in the display window when the electromagnetic fields radiated from buried or overhead power lines are picked up by the new sensitive electronic circuitry
- Patented electronic balancing procedure allows balancing to be done quickly and efficiently
- Approximately 100 hours of operation before batteries need changing
- Quick-access battery compartment
- Adjustable sensitivity and volume controls
- Single hand touch-switch operation for power on/off
- Erase button to virtually erase interferences such as a nearby fence allowing the signal to return to the normal audio tone
- Deep tone audio signals peak over magnetic objects to easily narrow down searches
- The tube is waterproof to just under the plastic housing, the housing is water-resistant

#### Includes:

- MT102, Magna-Trak 100 Series Magnetic Locator - 19-557
- Soft Carrying Case
- Instruction Manual
