K 1260

The Husqvarna K 1260 is the market's most powerful cutter, with an impressive 5.8 kW (7.8 hp) output. Featuring the new generation Active Air Filtration™, one of the market's most efficient centrifugal air cleaning systems that delivers up to one year's operation without a filter change as well as a highly efficient vibration dampening system. The K 1260 is ideal for heavier cutting of concrete and stone in alterations, renovations and new construction. It is perfect for cutting smaller holes outdoors and adjusting window and door openings, as well as for pipe, asphalt and metal cutting.

SMARTCARB™

Built-in automatic filter compensation, maintains high power and lowers fuel consumption.

POLY-V BELT

Several models are equipped with a Poly-V belt, for better transmission of power, extended product life and service intervals.

ANTI-VIBRATION SYSTEM

Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. The distance between the handles is large to enable the user a comfortable operating position and to reduce strain. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.

DEX

DEX, the new Dust Extinguisher System that gives cleaner cutting with less water usage and slurry.

Features

- The new generation of Active Air Filtration™ is one of the most efficient air filtration systems on the market, delivering operational times (for dry cutting) of up to one year, with no filter service required.
- One of the market's most powerful power cutters.
- The new generation of Active Air Filtration™ is one of the most efficient air filtration systems on the market, delivering operational times of up to one year, with no filter service required.
- SmartCarb™, built-in automatic filter compensation, maintains high power and lowers fuel consumption.
- The Poly-V belt provides better transmission of power, less frequent re-tensioning and greatly extended product life.
- Efficient vibration dampening reduces vibrations to less than 5 m/s² for more convenient operation.

Technical data

Cylinder displacement	118.8 cc
Power output	7.9 hp
Vibrations front handle	3.3/3.6 m/s ²
Vibrations rear handle	3.5/4.1 m/s ²
Sound pressure level at operators ear	103 dB(A)
Sound power level, guaranteed (LWA)	117 dB(A)
Blade diameter	14/16 "
Max cutting depth	5/6 "
Weight (excl. cutting equipment)	30.2/31.7 lbs
