## K 970

The new Husqvarna K 970 is our latest and most powerful handheld power cutter, featuring the revolutionary X-Torq® engine technology. It is a unique machine, in a class of its own when it comes to emission levels, efficiency and maneuverability.

### ACTIVE AIR FILTRATION™

The new generation of Active Air Filtration™ is one of the most efficient air filtration systems on the market, delivering operational times (for dry cutting) of up to one year, with no filter service required.

### DUALCHARGE™

New DualCharge™ engine technology provides more power, lower fuel consumption and greatly reduced emissions.

### DURASTARTER™

Patented, dust-sealed starter unit, seals the return spring and the pulley bearing. This makes the starter virtually maintenance free further boosting the reliability of our cutters.

### EASYSTART

Ensures 50% easier starting by reducing the compression in the cylinder during starting.

## Features

- All our cutters except the K 3000 Electric feature our robust new wet cutting kit, with low water usage.
- The cutting arm is reversible which lets you cut closer to walls or the ground. The drive belt has a fully sealed transmission. This keeps out cutting dust, reducing wear on the belt.
- Sealed transmission reduces the wear and slippage risk.
- Our anti-vibration system reduces vibrations in the cutter handles, so they are more comfortable to hold and can be used for longer periods. The distance between the handles is large to enable the user a comfortable operating position and to reduce strain. The handles and the short engine body mean the user always stands close to the machine, for easier handling and control.
- DEX, the new Dust Extinguisher System that gives cleaner cutting with less water usage and slurry.
- Compact design, low weight and correctly positioned handles make our machines easier to handle. Also, our anti-vibration system in the handles provides a more convenient handling during long shifts.
- The new generation of Active Air Filtration™ is one of the most efficient air filtration systems on the market, delivering operational times of up to one year, with no filter service required.
- Engine with X-Torq produces 75 % less emissions, 20 % lower fuel consumption and more power.
- DuraStarter™, the dust-sealed starter, and the durable starter cord reduce the risk of downtime and increase reliability and product life.
- SmartCarb™, built-in automatic filter compensation, maintains high power and lowers fuel consumption.
- Easy to start thanks to Air Purge and decompression valve.
- The Poly-V belt provides better transmission of power, less frequent re-tensioning and greatly extended product life.
- Efficient vibration dampening reduces vibrations to less than 5 m/s<sup>2</sup> (applies to the 350 and 400 mm blades), for more convenient operation.
- Fuel indicator in the tank shows fuel level, to help avoid unnecessary stoppages.

## Technical data

Cylinder displacement	93.6 cc
Power output	6.5 hp
Vibrations front handle	3.1/3.7/2.5 m/s <sup>2</sup>
Vibrations rear handle	5.4/4.5/3.5 m/s <sup>2</sup>
Sound pressure level at operators ear	104 dB(A)
Sound power level, guaranteed (LWA)	114 dB(A)
Blade diameter	12/14/16"
Max cutting depth	4/5/6"
Weight (excl. cutting equipment)	23.4/24.3/26 lbs
