GPi 1700

Portable Inverter Generators (1700 - 4300 W)

Convenient, go anywhere power

The GPi 1700 inverter generator is portable enough for one person carry by the convenient suitcase handle. It offers portable power for commercial and residential use. Through the inverter technology, this unit offers the same clean AC power that is provided by a standard household outlet, making it ideal for powering small tools and sensitive electronics.

- Inverter technology allows for variable engine speed that automatically adjusts to the power needs of the connected equipment, reducing operating costs and extending time between refueling.
- Integrated flywheel and generator design results in compact, lightweight unit that is quiet and fuel efficient.
- High surge capacity provides for output as high as 120% over rated power for up to 20 seconds.
- GFCI protected 110V duplex outlet for personal protection.
- Industrial grade overhead cam engine for optimal performance and longevity.

GPi 1700

Portable Inverter Generators (1700 - 4300 W)

Technical specifications

Dimensions

L x W x H	19.3 x 11.6 x 17.5 in
L x W x H Shipping	22.4 x 14.6 x 20.1 in
Weight Dry	45.2 lb
Operating weight	52 lb
Shipping weight	55 lb

Electrical system

Electrical power (Max.)	1,650 W
Electrical power (Continuous)	1,350 W
Voltage	120 V
Current AC (Continuous)	11.3 A
Circuit breaker DC	10 A
Frequency	60 Hz
Power factor	1 cos Φ 1~
Receptacles AC	1 NEMA 5-20R
Receptacles DC	+/- Terminals
Generator insulation (class)	B

Engine / Motor

Engine / Motor manufacturer	Robin
Engine / Motor	EH09-2
Fuel type	Gasoline
Cylinder	1
Displacement	5.23 in^3
Operating performance	2.82 hp
RPM / speed	4,200 rpm
Power Rating Specification	SAE J1349
Fuel consumption	0.26 US gal/h
Tank capacity Gasoline	1.06 US gal
Tank capacity Oil	0.42 US qt

ICM of America Internet Sales 877-494-5793

Runtime	4 h
Starting device	Recoil
