Fatboy Max Sleeve

225-2448MG with sleeve installed

Our FatBoy Max-sleeves™ were designed to be an extra protective layer over our 12"-18" multisize FatBoy™ plugs and all of our larger plug products greatly reduces damage a plug can sustain from pipeline debris, degraded pipe and sharp objects.

Our Max-sleeves™ provide an extra 1/4" layer of rubber which will extend the life of the plugs by protecting the plug's natural rubber surface during transport and installation.

Our Max-sleeves™ are also very effective in coastal regions which may subject pipe plugs to damage from barnacles and other sea life.

All Max-sleeves™ have four 3/8" eyelets to allow you to ensure the Max-Sleeve™ stays on the plug during transport and installation.

Our Max-sleeves™ are great for rental distributors or anyone who wants to maximize the life and durability of their pipe plugs.

Add SI to the end of any sleeve part number and the sleeve will be installed on a matching sized plug (plug sold separately).

Plug installation includes 5/16" coated cable for securing the sleeve to the plugs (15"-30" and larger).

Description	Part #	Product Weight	Product Length	Eyelets
12"-18" Max-Sleeve™	600-1218	10 LBS	28.00"	(4) 3/8" On Each End
