

## Sewer Cleaning Hose

# New Generation Cobra "Tuff-Skin"

**Poly-Flow** has blended **over 25 years** of hose engineering and state-of-the-art technology to provide a new revolutionary line of **Cobra "Tuff-Skin"** Sewer Cleaner/Water Jetting Hose.

Building upon the current outstanding characteristic of our standard **Cobra** product, this new, proprietary, polyurethane cover compound has been specially formulated for outstanding low coefficient of friction (less drag), and superior abrasion resistance for the toughest of applications.

### **Better Coupling Retention**

By utilizing a coupling with better cold flow characteristics, the **Cobra "Tuff-Skin"** hose has exceptional coupling retention.

The new **Cobra "Tuff-Skin"** product was not only designed for improved protection from the harsh environment, but for increased efficiency as well. Due to the special design, less water pressure is needed to move the hose, resulting in greater water pressure and jetting action at the nozzle.

### **75% - Coefficient of Friction**

Test reports show that the new **Cobra "Tuff-Skin"** cover reduces the coefficient of friction by up to 75% over standard polyurethane covers (less drag).

### **67% - Superior Abrasion**

Tests report a 67% improvement in abrasion and chatter gouging over standard polyurethane covers with the new **Cobra "Tuff-Skin"** cover.

### **Thicker Cover**

15-20% thicker cover for added protection.

### **Proprietary Tube**

Specially formulated elastomer for a higher resistance to hydrolysis (water degradation) and improved flexibility.

### **Better Bond**

Proprietary bonding process that provides exceptional adhesion – tube to braid and braid to cover.
