Streaks are a thing of the past with the 3D Radial Clean Nozzle! 3D fluid mechanics deliver smooth water to the rear 45° fan jets creating a spray pattern that is fanned-out 360°. The powerful spray pattern is capable of removing grease, scale, dirt and sand from the walls of the pipe without leaving streaks behind. The additional rear 15° propulsion jets not only move the nozzle up the line but also help transport material back to the manhole. This high performing nozzle is perfect before CCTV inspection.
